1.0 SUMMARY

At the request of The City of Blue Island, Earth Tech AECOM, Inc. has performed a Phase I Environmental Site Assessment (ESA) in accordance with the Scope of Services attached in Appendix A and in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 of the Property located at 12301 S. Western Avenue, Blue Island, Illinois 60406 (the "Property"). Any exceptions to, or deletions from, the ASTM Practice are described in Chapter 2.0 of this report. This assessment has revealed no evidence of "recognized environmental conditions" (as that term is defined in ASTM Standard Practice E1527-05) in connection with the Property, except for the following:

The Property has a long term history of operating as an automotive repair facility. There is a potential for the chemicals and hazardous wastes used, stored, and generated in association with the automotive repair operations to have impacted the subsurface soils and/or groundwater of the Property.

The Property has a long term history of housing several petroleum USTs. The USTs were removed and no leaks were reported at the time of the removal, however, there is the potential that the subsurface soils and/or groundwater were impacted by unreported over-fills and/or spills that may have occurred.

Based on the age of the site building, there is a potential for PCBs containing light ballasts to be present within the site building.

Based on the age of the site building, there is a potential for asbestos containing materials to be present within the site building.

Based on the age of the site building, there is a potential for lead-based painted to be present within the site building.

The standard professional practices that Earth Tech AECOM conducted to determine if any recognized environmental condition(s) existed in connection with the Property included, among other things, a visual inspection of the Property, interviews with selected individuals who might have knowledge of its recognized environmental conditions, a review of readily available historical information such as aerial photographs and fire insurance maps that depict it, a drive-by inspection of accessible adjacent parcels, a review of selected environmental records that were made available to Earth Tech AECOM, and a review of a computer search of selected Federal and State environmental databases for indications of the presence of hazardous substances or petroleum products on the Property or on nearby parcels from which those substances might migrate to the Property in other than vapor form.

This report is intended for use only as the complete document. It is based upon the Scope of Services, and is subject to the Limitations and Exceptions and other restrictions, defined herein. It has been prepared for the exclusive use of The City of Blue Island and its legal counsel. No other person or organization is entitled to rely upon any part of it without the prior written consent of Earth Tech AECOM. The City of Blue Island or its legal counsel may release or authorize the release of all or part(s) of this report to third parties. However, if any third party uses or relies on this report without the express written permission of Earth Tech AECOM, such third party agrees that it shall have no legal recourse against Earth Tech AECOM or its parent or subsidiaries, and shall indemnify and defend them from and against all claims arising out of or in conjunction with such use or reliance.

2.0 INTRODUCTION

This Phase I Environmental Site Assessment (ESA) report for the site located at 12301 S. Western Avenue, Blue Island, Illinois 60406 (the “Property”) was prepared by Earth Tech AECOM, Inc. for The City of Blue Island, who is the “User” of this report, as that term is defined in ASTM Standard Practice E1527-05 for a Phase I Environmental Site Assessment. In this report, the term User includes any legal counsel or other representative of the User.

The format of this report generally follows the recommendations in ASTM Standard Practice E1527-05. The following two definitions from that Standard are important for understanding this report. Terms in italics are defined in that Standard Practice.

- 3.3.31 *recognized environmental conditions* - the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structure on the *property* or into the ground, ground water, or surface water of the *property*. The term includes *hazardous substances* or *petroleum products* even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not represent a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis are not *recognized environmental conditions*.
- 3.3.16 *historical recognized environmental condition* - environmental condition which in the past would have been considered a *recognized environmental condition*, but which may or may not be considered a *recognized environmental condition* currently.

2.1 Purpose

The primary purpose of this ESA was to provide the intended recipients with information about the general environmental character of the Property.

To the extent applicable, another purpose was to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner*, *contiguous property owner*, or *bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the “*landowner liability protections*,” or “*LLPs*”). An ESA in conformance with ASTM E1527-05 constitutes “*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice” as defined at 42 U.S.C. §9601(35)(B). Terms in italics in this paragraph are defined in the U.S.C.

2.2 Detailed Scope of Services

The detailed Scope of Services for this ESA is in Appendix A. The standard professional practices that Earth Tech AECOM conducted to determine if any recognized environmental condition(s) existed in connection with the Property included, among other things, a visual inspection of the Property, interviews with selected individuals who might have knowledge of its recognized environmental conditions, a review of readily available historical information such as aerial photographs and fire insurance maps that depict it, a drive-by inspection of accessible adjacent parcels, a review of selected environmental records that were made available to Earth Tech AECOM, and a review of a computer search of selected Federal and State environmental databases for indications of the presence of hazardous substances or petroleum products on the Property or on nearby parcels from which those substances might migrate to the Property in other than vapor form.

In general, the Scope of Services has been completed in accordance with the scope and limitations of ASTM Standard Practice E1527-05, with the provision that any deviations from the ASTM Standard are discussed in Chapter 11.0.

2.3 Significant Assumptions

In preparing this report, Earth Tech AECOM has relied upon certain verbal information and representations provided by government employees and others, documents provided by the Property owner and/or operator, and a computer search of government databases by a firm whose business is to provide that service. Except as discussed, Earth Tech AECOM has relied upon that information and did not attempt to independently verify its accuracy or completeness, but did not detect any inconsistency or omission of a nature that might call into question the validity of any of it. To the extent that the conclusions in this report are based in whole or in part on such information, they are contingent on its validity. Earth Tech AECOM assumes no responsibility for any consequence arising from any information or condition that was concealed, withheld, misrepresented, or otherwise not fully disclosed or available to Earth Tech AECOM.

2.4 Limitation and Exceptions

During the site reconnaissance, certain interior portions of the site building of the Property could not be fully assessed due to locked doors. Specifically, the garage portion of the building was not inspected.

This report is limited to representations of identified recognized environmental conditions on and near the Property as they existed at the time of this ESA, and of the conclusions drawn based upon the information obtained and assumptions made during the assessment process. This ESA was restricted to the Scope of Services as defined herein. No representations or warranties are made concerning the nature or quality of the air, soil, water, building materials, or any other substance on the Property (including the potential for any substance to migrate into a structure), other than the visual observations and the representations by others as stated in this report. By definition, a Phase I ESA is not intended to be a definitive investigation of existing or potential adverse environmental impacts, and thus it is possible that such an impact exists on the Property but was not identified during the ESA. Conclusions in this report represent professional judgments based upon the information evaluated during the course of the assessment, not scientific certainties.

Within the limitations of the agreed-upon Scope of Services, this ESA has been undertaken and performed in a professional manner, in accordance with generally accepted practices, using the degree of skill and care ordinarily exercised by reputable environmental consultants under similar circumstances. No other warranty, express or implied, is made.

2.5 Special Terms and Conditions

There were no special terms and conditions between the User and Earth Tech AECOM.

2.6 User Reliance

This report is intended for use only as the complete document. It is based upon the Scope of Services, and is subject to the Limitations and Exceptions and other restrictions, defined herein. It has been prepared for the exclusive use of the City of Blue Island and its legal counsel. No other person or organization is entitled to rely upon any part of it without the prior written consent of Earth Tech AECOM. The City of Blue Island or its legal counsel may release or authorize the release of all or part(s) of this report to third parties. However, if any third party uses or relies on this report without the express written permission of Earth Tech AECOM, such third party agrees that it shall have no legal recourse against Earth Tech AECOM or its parent or

subsidiaries, and shall indemnify and defend them from and against all claims arising out of or in conjunction with such use or reliance.

3.0 PROPERTY DESCRIPTION

3.1 Location and Legal Description

The Property is located at 12301 S. Western Avenue, Blue Island, Illinois 60406. Its general location is depicted on the maps in the database search report in Appendix D-1. Appendix B contains a drawing showing its essential features.

The User did not provide a legal description or survey of the Property to Earth Tech AECOM.

3.2 Property and Vicinity General Characteristics

The Property occupies approximately 0.20 acres and contains one building having an estimated total floor area of approximately 1,000 square feet. It is located in an area characterized by a mixture of residential and commercial parcels. Additional information about the Property and its environs is in Appendices B through E.

3.3 Current Use of the Property

The Property is currently occupied by a vacant building, however it was previously used as a automotive repair facility.

3.4 Detailed Property Description

Photographs of portions of the Property are in Appendix C. The site building contains a lobby area, hallways, and the automotive repair garage. It has a concrete slab first floor on grade (no basement). There are no floor drains in the building, except in the rest rooms.

The site building is heated by burners fueled with natural gas, which is supplied by Nicor. Potable water is obtained from the City of Blue Island. Sanitary wastewater is discharged to the municipal sewer system, which leads to the local Publicly Owned Treatment Works (POTW).

Information gathered during the Property inspection and background research indicated that no stationary aboveground storage tanks (ASTs) are known to presently be or formerly have been on the Property. The following underground storage tanks (USTs), excluding water tanks, are known to presently be or formerly have been on the Property:

Tank No.	Type/Size	Location	Contents	Age
1	Unknown/3000-gallon	Removed/Southwest of site building	Diesel	99
2	Unknown/5000-gallon	Removed/Southwest of site building	Diesel	99
3	Unknown/1000-gallon	Removed/Southwest of site building	Diesel	99
4	Unknown/4000-gallon	Out of Service/Southwest of site building	Gasoline	12
5	Unknown/4000-gallon	Out of Service/Southwest of site building	Diesel	12
6	Unknown/6000-gallon	Out of Service/Southwest of site building	Gasoline	12

The status of these USTs is discussed in Section 5.1, Registered UST Sites.

The potential also exists for a UST that is not discussed above to be present on the Property for which no visual, documentary, or anecdotal evidence of its existence was found during this ESA.

3.5 Current Uses of Adjacent and Surrounding Parcels

The Property is bounded on the north by 123rd Street, followed by a commercial strip mall, on the east and south by Hart Park, and on the west by Western Avenue, followed by a vacant lot. No adjacent parcel was judged to have the potential for a significant adverse impact on the environmental condition of the Property.

Other parcels that are not adjacent to the Property but are near it, and whose historical usages may have involved the use or release of hazardous substances or petroleum products in significant quantities, include Aldi, Inc., located at 12215 S. Western Avenue and the Thorton Oil Corp, located at 121st and Western. Based on the proximity to the Property, these nearby parcels have a low to moderate potential to impact the environmental condition of the Property (see Section 5).

4.0 USER PROVIDED INFORMATION

4.1 Title Records

The User did not provide any title records, or comparable legal records of current and/or historical ownership.

4.2 Environmental Liens or Activity Use Limitations

No representative of the User reported any environmental lien, activity use limitation, or comparable encumbrance upon the Property.

4.3 Specialized Knowledge

The User did not provide Earth Tech AECOM with any document describing any previous assessment, soil or ground water quality evaluation, or other investigation pertaining to the environmental condition of the Property.

4.4 Valuation Reduction for Environmental Issues

The User did not provide Earth Tech AECOM with any information related to a reduction in the value of the Property due to environmental issues.

4.5 Owner, Property Manager, and Occupant Information

According to the User, the Property is currently owned by Robert Werniak, and is currently occupied by a vacant building.

4.6 Reason for Performing the Phase I ESA

According to the User, the Phase I ESA that resulted in this report was performed in contemplation of a change in the ownership and use of the Property.

4.7 Other User Information

The User did not provide any other information that was material to this Phase I ESA.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Government databases that identify sites of environmental concern were reviewed via a computerized search conducted by Environmental First Search[®], a commercial database service, to determine if the Property was listed or if any listed site was nearby. Environmental First Search[®] has represented that its procedures conform to, or exceed, the requirements of ASTM Standard Practice E1527-05. Most of the information in this Section has been extracted from the report in Appendix D-1 that describes the results of that search. That report includes information about sites close to the Property, and also about Orphan sites that are in the vicinity but are not precisely locatable from the address information in the databases. The information in the search report has been evaluated in conjunction with the results of the Property inspection and the evaluation of its setting. Except as specifically discussed, listed sites that were estimated not to be actually or potentially upgradient from the Property were judged not to represent an environmental concern with respect to the Property.

Federal databases searched included, but were not limited to: NPL (National Priority list), PROPOSED NPL, DELISTED NPL, NPL Recovery (Federal Superfund Liens), CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System), CERC-NFRAP (CERCLIS No Further Remedial Action Planned), CORRACTS (Corrective Action Reports under RCRA), RCRA (Resource Conservation and Recovery Act Information), ERNS (Emergency Response Notification System), HMIRS (Hazardous Materials Information Reporting System), US BROWNFIELDS, CONSENT (Superfund/CERCLA Consent Decrees), ROD (Records of Decision for NPL sites), FINDS (Facility Index System), PADS (PCB Activity Database System), RAATS (RCRA Administrative Tracking System), TRIS (Toxic Chemical Release Inventory System), and TSCA (Toxic Substances Control Act).

State databases searched included, but were not limited to: LUST (Leaking Underground Storage Tanks), UST (Registered Underground Storage Tanks), SHWS (State Hazardous Waste Sites), SWF/LF (Solid Waste Disposal Facilities), SPILLS (Spills List), and AST (Registered Aboveground Storage Tanks).

Approximate minimum search distances for the researched databases were in accordance with ASTM Standard Practice E1527-05.

In this Section, “Orphan” means a site not precisely locatable by Environmental First Search[®] from the information in the database, and any *[text in italics within brackets]* is explanatory information obtained by the assessor.

NPL, Proposed NPL, Delisted NPL, and Consent Sites

The Property is not identified as being an NPL, Proposed NPL, Delisted NPL, or CONSENT site. No site on the NPL, Proposed NPL, Delisted NPL, or CONSENT list is identified as being located within one mile of the Property or as an Orphan site.

CERCLIS Sites

The Property is not identified on the CERCLIS list. No site on the CERCLIS list is identified as being located within one-half mile of the Property or as an Orphan site.

CERC-NFRAP Sites

The Property is not identified as having been removed from the CERCLIS list and transferred to the CERC-NFRAP list because of a decision of No Further Remedial Action Planned by the EPA. No site on the CERC-NFRAP list is identified as being located within one-fourth mile of the Property or as an Orphan site.

RCRA Corrective Action Sites

The Property is not identified as being a CORRACTS site. No site on the CORRACTS list is identified as being located within one mile of the Property or as an Orphan site.

RCRIS Hazardous Waste Generator Sites

The Property is identified as having filed a RCRA notification as a small quantity hazardous waste Generator. No violations have been reported. According to the Property owner, ignitable type of hazardous waste was generated, all wastes were stored indoors, secondary containment was beneath the waste storage locations, and no spills occurred at the site. In addition, the Property is currently vacant; as such, no hazardous wastes are currently generated or stored at the facility.

No site having filed a RCRA notification as a Large Quantity Generator (LQG) of hazardous waste is identified as being located within one-fourth mile of the Property or as an Orphan site.

Four sites that filed RCRA notifications as Small Quantity Generators (SQGs) are identified as being located within one-eighth mile of the Property. No violations were reported at these facilities. Based on the lack of reported violations that could suggest a release or mishandling of hazardous waste, the potential impact upon the Property is considered to be low.

RCRIS Hazardous Waste TSD Facility Sites

The Property is not identified as being a RCRA Treatment, Storage, or Disposal (TSD) Facility. No site on the TSD Facility list is identified as located within one mile of the Property or as an Orphan site.

Leaking UST Sites

The Property is not identified as having reported a leak involving a UST system (LUST site).

Ten LUST sites are identified as being located within one-half mile of the Property. The nearest sites that are, or might be, upgradient are: Shell Oil, Co. (11901 S. Western), S and K Management (11920 S. Western), Terry's Buick/ Fred James Buick (12000 S. Western), Thornton Oil Corp. (121st and Western), and Aldi, Inc. (12215 S. Western). NFR letters have been issued for three (Shell Oil, Co., S and K Management, Terry's Buick/ Fred James Buick) of these five LUST sites; as such, the potential for these sites to impact the Property is considered low. The potential for the remaining nearby LUST sites (Thornton Oil Corp. and Aldi, Inc.) to have adversely impacted soil or ground water on the Property is considered to be low to moderate because of the distance from the site (greater than 500 feet) and the presence of building foundations and underground utilities that may act as alternate pathways away from the Property.

Registered UST Sites

Six (four diesel and two gasoline of various sizes) registered USTs are identified as having been located at the Property. According to the environmental database, three of the USTs have been removed and three are

permanently out of service. No releases or leaks were reported in association with the USTs at the Property. The out of service USTs were certified to have not leaked by the OSFM. Based on the removal or permanently out of service status, the potential for impacts to the Property from the registered USTs is considered low.

Four sites within one-eighth mile of the Property were reported as having registered USTs. All of these UST sites are either out of service or exempt from registration. Leaks have been reported for 3 of the facilities. These facilities are discussed in greater detail in the Leaking UST section above.

Other Lists of Sites of Concern

The Property is not identified on any of the other lists searched.

Montell Pontiac (12201 S. Western) is identified as enrolled in the IEPA Site Remediation Program. An NFR letter has not been issued for the site at the time of publication of this report; however, based on the distance from the Property (greater than 500 feet) and the presence of underground utilities and building foundations that may act as alternate pathways away from the Property, the potential for this facility to impact the Property is considered low. No other located site is identified as being near the Property and in a location that is, or might be, upgradient from it, and represent a realistic potential concern with respect to its environmental condition. Also, no Orphan site was determined to actually be located within an applicable search radius of the Property and potentially upgradient of it.

5.2 Additional Environmental Record Sources

To enhance and supplement the standard environmental record sources summarized in Section 5.1, above, the following additional records sources were reviewed:

Types of Records:

- Local Brownfield Lists
- Local Lists of Landfill/Solid Waste Disposal Sites
- Local Lists of Hazardous Waste/Contaminated Sites
- Local Lists of Registered Storage Tanks
- Local Land Records (for activity and use limitations)

Sources:

- Department of Health/Environmental Division
- Fire Department
- Planning Department
- Building Permit/Inspection Department
- Local/Regional Pollution Control Agency

Information in those records pertaining to the environmental condition of the Property included:

- City of Blue Island Building Department
Several copies of permits and inspection reports associated with the installation and removal the USTs were obtained. These documents confirm that no releases from the USTs occurred at the Property.

Appendix E contains copies of the City of Blue Island records.

5.3 Physical Setting Sources

The database search report in Appendix D-1 contains an excerpt from a topographic map that depicts the Property and its vicinity.

5.4 Historical Use Information

5.4.1 Aerial Photographs

Aerial photographs (in Appendix D-2) were reviewed for the years: 1939, 1952, 1974, 1984, 1999, and 2005. The composite historical timeline in Section 5.5 contains a summary of the observations made from those aerial photographs.

5.4.2 Historical Fire Insurance Maps

Historical fire insurance maps (in Appendix D-3) were reviewed from the years: 1886, 1897, 1911, 1949, 1950, 1951, and 1958. The composite historical timeline in Section 5.5 contains summaries of the observations made from those fire insurance maps.

5.4.3 Historical Topographic Maps

No historical topographic maps depicting the Property were located that were readily accessible and practically reviewable within the time constraints of this assessment.

5.4.4 Historical City Directories

No historical city directory listings depicting the Property were located that were readily accessible and practically reviewable within the time constraints of this assessment.

5.4.5 Additional Historical Sources

Building department permits on file were researched for the Property address. Records were found dating from 1975 through 2007. The composite historical timeline in Section 5.5 contains a summary of observations made from those building department records.

5.5 Composite Historical Timeline

Year	Source	Discussion
1886	Sanborn Map	The Property and the adjacent properties are not depicted on this Sanborn Map.
1897	Sanborn Map	The Property and the adjacent properties are not depicted on this Sanborn Map.
1911	Sanborn Map	The Property and the north, east, and south parcels are not depicted on this Sanborn Map. The west adjacent parcel is vacant land.
1939	Aerial Photograph	The Property is depicted with a structure situated on the southeastern corner. A park is situated to the south and east. A commercial structure is situated to the north. Residential structures are situated to the west.

Year	Source	Discussion
1949	Sanborn Map	The Property and the north, east, and south parcels are not depicted on this Sanborn Map. The west adjacent parcel is depicted as a filling station with three gas tanks. The northwest adjacent parcel is depicted as a storefront with the western portion of the parcel labeled "Auto".
1950	Sanborn Map	The Property and the adjacent properties are not depicted on this Sanborn Map.
1951	Sanborn Map	The Property depicted as a filling station. A ball park is depicted to the south and east. A filling station is depicted to the west, the gas tanks are no longer depicted. The north adjacent parcel is not depicted on this Sanborn map.
1952	Aerial Photograph	The Property and the adjacent sites appear as in the 1939 photograph.
1958	Sanborn Map	The Property depicted as a filling station and an auto repair facility. The north adjacent parcel is not depicted on this Sanborn map. The east, west, and south adjacent parcels are depicted as in the 1951 Sanborn Map.
1974	Aerial Photograph	The Property and adjacent parcels appear essentially as in the 1952 photograph, except that additional residential development is present to the north and west.
1984	Aerial Photograph	The Property and the adjacent sites appear as in the 1974 photograph.
1989	City Of Blue Island – Building Dept.	(3/14/1989) An application for the construction of an addition to the site building. (5/25/1989) A permit for the removal of existing USTs and the installation of new USTs.
1999	Aerial Photograph	The Property and adjacent parcels appear essentially as in the 1952 photograph, except that an additional commercial structure is present to the north and additional structures are present on the Park to the south.
2000	City Of Blue Island – Building Dept.	(3/17/2000) A permit for the installation of a paint booth heater.
2005	Aerial Photograph	The Property and adjacent parcels appear essentially as in the 1999 photograph, except that the adjacent parcel to the northwest is improved with a commercial structure.
2007	City Of Blue Island – Building Dept.	(10/1/2007) An application for the removal of 3 USTs from the Property. (5/1/2007) A permit for the removal of USTs from the Property. According to the permit, 3 USTs (two 4,000-gallon gasoline and one 6,000-gallon diesel) were removed from the Property, no leaks were reported.

Historical Summary: The site building was constructed circa 1939, with an addition constructed in 1975. The Property has operated as a filling station and/or automotive repair facility between 1950 and 2007. Three USTs were removed from the site in 1989 and replaced with three more USTs. The three newer USTs were removed from the Property in 2007. There is a potential that the chemicals (which typically includes petroleum products, solvents-based products and paints) used in association with the automotive repair operations at the Property to have impacted the subsurface soils and/or groundwater.

5.6 Historical Use Information on Adjacent Parcels

Historical uses of adjacent parcels are discussed in the Composite Historical Timeline, in Section 5.5 above.

6.0 PROPERTY RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Mr. Bryant Williams conducted a visual reconnaissance of the Property on November 6, 2008. Mr. Williams was unaccompanied during the site reconnaissance. The exterior portion involved walking the Property, including the boundaries. The interior of the building was observed sufficiently to identify actual or potential recognized environmental conditions, except for the former garage area because it was locked. Pertinent environmentally related observations and findings are described in the following Sections.

6.2 General Property Setting

The elevation of the Property, as determined from the topographic map in the database search report in Appendix D-1, is about 640 feet above Mean Sea Level. The local topography can be characterized as flat, with higher elevations to the north.

No stream or other body of surface water was observed on or adjacent to the Property. The land surface slopes downward to the south toward the Calumet Sag River about 1.5 miles away. There is no downgradient body of surface water within one mile of the Property.

No information was readily accessible and practically reviewable regarding the approximate depth to shallow ground water on the Property. The inferred direction of shallow ground water flow in the area, based upon the Property inspection and an examination of the topographic map, is to the south, although buildings and other conditions on the Property and nearby parcels, and sewer lines and/or other buried utility lines, may be significantly affecting the local flow pattern.

6.3 Exterior Observations

The site building is a one-story structure with exterior walls constructed of brick and cinderblock. The flat roof is constructed of rubber membrane. The parking lot and driveway are asphalt-paved. Together, the building, parking lot, and driveway occupy nearly 100% of the developed portion of the Property. A portion of the driveway, located to the northwest of the site building, is covered by gravel and fill material. According to the documents acquired from the City of Blue Island, this is where the USTs were located at the Property. No other structures on the Property.

A visual inspection of the exterior areas did not reveal any stain (other than typical minor parking lot stains), unusual odor, stressed vegetation (other than related to the climate), or other physical evidence of an adverse environmental impact.

Storm water runoff from the Property apparently is via sheet flow to the storm water drains located on 123rd Street and Western Avenue. Standing (pooled) water was not observed on the Property.

6.4 Interior Observations

The garage portion (the eastern portion) of the site building was not inspected due to locked doors.

Housekeeping

The building interior did not exhibit any visual evidence of surficial impacts. No containers or materials were observed stored within the building. No evidence of a leak or spill was observed in the areas inspected. No unlabeled container that might have contained a hazardous substance or petroleum product was observed in the areas inspected.

PCBs

No oil-filled transformer or capacitors were observed indoors. Light ballasts were not inspected due to access limitations, however based upon the age of the site building, there is a potential that PCB-containing light ballasts may be present.

Asbestos-Containing Materials

The interior of the site building has walls constructed of wallboard (sheetrock) and ceramic floor tiles in the areas observed. Those materials appeared to be in good condition. Based upon the unknown date of construction and installation of the building materials, and EPA and OSHA guidance documents, those materials must be considered "presumed asbestos-containing materials" (PACM).

Lead-Based Paint (LBP)

A visual inspection was conducted to determine the potential presence of lead-containing paint in poor condition. No paints were observed within the site building to be in poor condition. Based on the date of construction, there is a potential that LBP may be present within the site building.

Hazardous Substances / Petroleum Products

No other hazardous substance or petroleum product was observed.

Refuse / Hazardous Waste

No refuse or hazardous waste was observed; however, the Property is reported as having submitted notification as a small quantity generator of hazardous waste.

7.0 INTERVIEWS

Records of interviews that contain information beyond that summarized in this Section are in Appendix F.

7.1 Interview With Owner

AECOM personnel attempted to interview Mr. Robert Werniak about the current and historical uses of the Property. Mr. Werniak indicated that the site is currently vacant, but was previously used as an automotive repair facility. Mr. Werniak also noted that an UST was removed from the Property (but no specifics pertaining to the size or contents were provided). No additional information pertaining to the Property was provided by Mr. Werniak.

7.2 Interview With Property Manager

The Owner interview (Section 7.1) suffices for an interview of the Property Manager.

7.3 Interviews With Occupants

The Owner interview (Section 7.1) suffices for an interview of the Property occupant.

7.4 Interviews With Local Government Officials

No local government official was interviewed.

7.5 Interviews With Others

At the time of site reconnaissance, AECOM personnel attempted to interview representatives of neighboring properties about the Property, but the neighbors declined to answer any questions.

8.0 FINDINGS

The following findings are based upon the information obtained during this ESA, and discussed in the previous sections of this report:

Known or Suspect Recognized Environmental Conditions

The long-term use of the Property as a filling station and automotive repair facility represents a Recognized Environmental Condition.

Historical Recognized Environmental Conditions

Although no releases were reported during their removal, the historic presence of USTs on the Property represents a Historical Recognized Environmental Condition.

Known or Suspect De Minimis Environmental Conditions

No such condition was identified.

Other Environmental Concerns

Based on the age of the site building, there is a potential for asbestos containing materials, lead-based paint, and/or PCBs containing light ballasts to be present within the site buildings.

9.0 OPINIONS

Based upon all of the information obtained, the environmental professional(s) who conducted this ESA believe that the known or suspect environmental conditions identified in Chapter 8.0 above have resulted in the impacts to the Property listed below, for the reasons given.

Based on the long-term use of the Property as an automotive repair facility, there is a potential that the subsurface soils and/or groundwater were impacted by the chemicals and hazardous wastes used, stored, and generated.

Based on the long-term use of the Property as a filling station with associated USTs, there is a potential that the subsurface soils and/or groundwater were impacted via over-filling and/or unreported spills or UST releases.

Based on the age of the site building, there is a potential for PCBs containing light ballasts to be present within the site building. The results of a hazardous materials survey may eliminate this issue as an environmental concern.

Based on the age of the site building, there is a potential for asbestos containing materials to be present within the site building. The results of an ACM survey may eliminate this issue as an environmental concern.

Based on the age of the site building, there is a potential for lead-based painted to be present within the site building. The results of an LBP survey may eliminate this issue as an environmental concern.

10.0 CONCLUSIONS

At the request of The City of Blue Island, Earth Tech AECOM, Inc. has performed a Phase I Environmental Site Assessment (ESA) in accordance with the Scope of Services attached in Appendix A and in general conformance with the scope and limitations of ASTM Standard Practice E1527-05 of the Property located at 12301 S. Western Avenue, Blue Island, Illinois 60406 (the "Property"). Any exceptions to, or deletions from, the ASTM Practice are described in Chapter 2.0 of this report. This assessment has revealed no evidence of "recognized environmental conditions" (as that term is defined in ASTM Standard Practice E1527-05) in connection with the Property, except for the following:

The Property has a long term history of operating as an automotive repair facility. There is a potential for the chemicals and hazardous wastes used, stored, and generated in association with the automotive repair operations to have impacted the subsurface soils and/or groundwater of the Property.

The Property has a long term history of housing several petroleum USTs. The USTs were removed and no leaks were reported at the time of the removal, however, there is the potential that the subsurface soils and/or groundwater were impacted by unreported over-fills and/or spills that may have occurred.

Based on the age of the site building, there is a potential for PCBs containing light ballasts to be present within the site building.

Based on the age of the site building, there is a potential for asbestos containing materials to be present within the site building.

Based on the age of the site building, there is a potential for lead-based painted to be present within the site building.

11.0 DEVIATIONS/DATA GAPS

Following is a list of the data gaps and deviations from ASTM Standard Practice E1527-05 that occurred during the performance of this assessment:

11.1 Historical Data Gaps/Data Failure

In accordance with the requirements in ASTM E1527-05, the history of the Property was researched back to the first developed use (including agricultural use or incidence of import of fill material), or to 1940, whichever was earlier.

In accordance with the requirements in ASTM E1527-05, when conducting the historical review, intervals of not greater than five years were researched, unless the use of the Property was unchanged over a period of longer than five years.

No further historical data sources were evaluated, because: (1) they were not *reasonably ascertainable*, and/or (2) the assessor's experience indicates that additional available sources were not likely to be sufficiently useful, accurate, or complete in terms of satisfying the historical research objectives. Based on these two criteria, the following standard historical sources were not evaluated:

- Topographic Maps
- Local Street Directories
- Zoning/Land Use Records
- Other Historical Sources, including miscellaneous maps, newspaper archives, internet sites, community organizations, local libraries, historical societies, current owners/occupants of neighboring parcels, or records in the files and/or personal knowledge of the Property owner and/or occupants.

11.2 Other Deviations/Data Gaps

No other deviation or data gap was identified that was deemed material to this assessment.

12.0 ADDITIONAL SERVICES

No additional services were requested to be included in this Phase I ESA.

The remainder of this report consists of the appendices that are listed in the Table of Contents.

APPENDIX A

SCOPE OF SERVICES

SCOPE OF SERVICES

Environmental Site Assessment Activities Included In the Scope of Services

The following activities constituted the Phase I Environmental Site Assessment (ESA) Scope of Services, to the extent feasible given the time, access, and other constraints of the project:

Observe accessible portions of the Property and the portions of adjacent parcels that are visible from the Property and public roads for overt causes for concern, such as the improper storage or use of petroleum products, chemicals or wastes, and the presence of tanks, oil-filled electrical equipment, stains, unusual odors, stressed vegetation, filled areas, and other indications of the potential presence of hazardous substances of regulatory concern.

Identify hazardous substances used (raw materials, operating supplies, oil-containing equipment, etc.), generated, and/or released (air emissions, wastewater discharges, etc.) on the Property in large quantities.

Describe or list each identified large aboveground storage tank (AST) or underground storage tank (UST) that is on the Property (except water tanks), and identify observed exterior tanks on adjacent parcels that may present a significant environmental risk if a release were to occur.

Briefly describe the nature and location of any observed interior construction materials on the Property that, based upon EPA and OSHA guidance documents, typically may be friable presumed asbestos-containing materials (ACM).

Interview an occupant(s) and/or representative(s) of the owner who reportedly is familiar with the history and use(s) of the Property, including any past uses of hazardous substances, and any hazardous substance incidents on it.

Identify the suppliers of water, fuels, electricity, and sewerage disposal, and any on-site source of water or waste disposal.

Review any Property records provided to the assessor(s) for indications of significant prior uses or releases of hazardous substances on the Property.

Evaluate a topographic map to ascertain the relative location of the Property with respect to adjacent parcels and regional drainage features.

Summarize information from available Sanborn® historical fire insurance maps that depict the Property about prior uses of it and adjacent parcels that may indicate potential concerns.

Examine aerial photographs that depict the Property, and are readily available for purchase from Environmental First Search® or for viewing in the vicinity of the Property at the time of the Property visit, for indications of potential concerns on or near the Property.

Review any maps, surveys, records of ownership (e.g., Chain of Title) and use, release cleanup records, evidence of a recorded environmental lien(s) against the Property, and other written materials provided to the assessor(s), to identify relevant information and to compare them to existing conditions.

Interview appropriate local fire department and/or government personnel familiar with past utilization of the Property and/or adjacent parcels, to the extent that such interviews are authorized by the Client and can be conducted at the time of the Property visit and in the same vicinity, or by telephone.

Obtain from Environmental First Search® a computer search of existing public record environmental databases, including those specified in ASTM Standard Practice E1527-05 that routinely are readily available in a searchable format, using search radii no less than those specified in that Standard Practice, then review that report for indications of potential environmental concerns on the Property or with a significant potential to affect it.

Obtain from Environmental First Search® and review a report of a search for any federal, state, local, or tribal environmental lien(s) against the Property that is/are recorded in the place where land title records are, by law or custom, recorded for the local jurisdiction in which the Property is located.

The significance of each identified potential concern is assessed using professional judgment, considering such factors as its nature, magnitude, and known or potential impact upon the Property, and if associated with an off-site source the location of that source with respect to the Property.

Research into the history of the Property's uses includes consulting only those standard historical sources that are reasonably ascertainable and readily reviewable given the time, access, and other constraints on the project, and that in the opinion of the assessor are judged likely to yield additional useful information about such uses.

Activities Excluded From the Scope of Services

Except to the extent included within the Scope of Services as described above, the following activities were excluded from the Scope of Services:

Acquiring a compilation of recorded land title records (e.g., a Chain of Title report) covering a period back to the earlier of 1940 or the first known developed use (including agriculture) of the Property.

Extending the research into the history of a Property farther back than the earlier of 1940 or the year when it was known to have first been developed for a commercial purpose other than agriculture.

Visiting governmental agencies or inspecting their records.

Certifying the validity of information obtained from other persons or entities.

Conducting an assessment for asbestos-containing materials (ACM), or for the intrusion into a structure of vapor that contains or may contain a hazardous chemical, petroleum product, or constituent thereof.

Collecting or analyzing any sample of air, water, soil, flora, fauna, a building material, or any other substance, or making any representation or certification regarding its nature or quality.

Evaluating the potential for any subsurface chemical to migrate into any structure.

Identifying or listing materials suspected to be lead-based paint, biologically active (including mold or mildew), radioactive, or otherwise hazardous.

Evaluating compliance by any owner or operator with laws, regulations, ordinances, or codes.

Evaluating factors that might affect the suitability of the Property for any particular purpose or use, such as zoning and other land-use restrictions, geotechnical considerations, or the presence on or near it of wetlands or other environmentally sensitive areas, endangered species, or locations that are culturally or historically important.

Recommending measures to address any identified concern or any additional investigative procedure(s) to more accurately characterize any potential concern.

Obligations of the User as Defined in ASTM Standard Practice E1527-05

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the “Brownfields Amendments” to CERCLA), the User was asked to provide Earth Tech AECOM with the information described below, to the extent known or available to the User, prior to the Property reconnaissance, with the understanding that failure to provide or fully disclose this information could result in a determination that “all appropriate inquiry” was not complete.

The name and telephone number of an owner and/or occupant contact or representative(s) who is knowledgeable about the Property.

The reason for undertaking the environmental site assessment, and if applicable the type of proposed transaction why the purchase or lease price of the Property may be significantly less than that of comparable land and improvements in the area.

Accurate information about the size, nature, location, and current and former uses of the Property, and (to the extent known) the age(s) of improvements on it; location information includes a complete address and a copy of the relevant portion of a local map on which the location of the center of the Property has been accurately marked (within 100 yards).

A legal description and/or survey of the Property, all available information pertaining to its historical uses and environmental condition, and all available records that indicate its historical ownership and/or use(s).

Any specialized knowledge or experience related to the Property or nearby parcels, such as involvement in the same type of activity as a current or former occupant of the Property or an adjoining parcel that results in knowledge of the hazardous substances or petroleum products likely to have been present.

Any information pertaining to, or suggesting, historical spills or other releases of hazardous substances or petroleum products on or near the Property, or the cleanup of such materials.

A description of any requested services that are not included within the scope of an ESA performed in accordance with ASTM Standard Practice E1527-05, and any special terms or conditions between the User and Earth Tech AECOM..

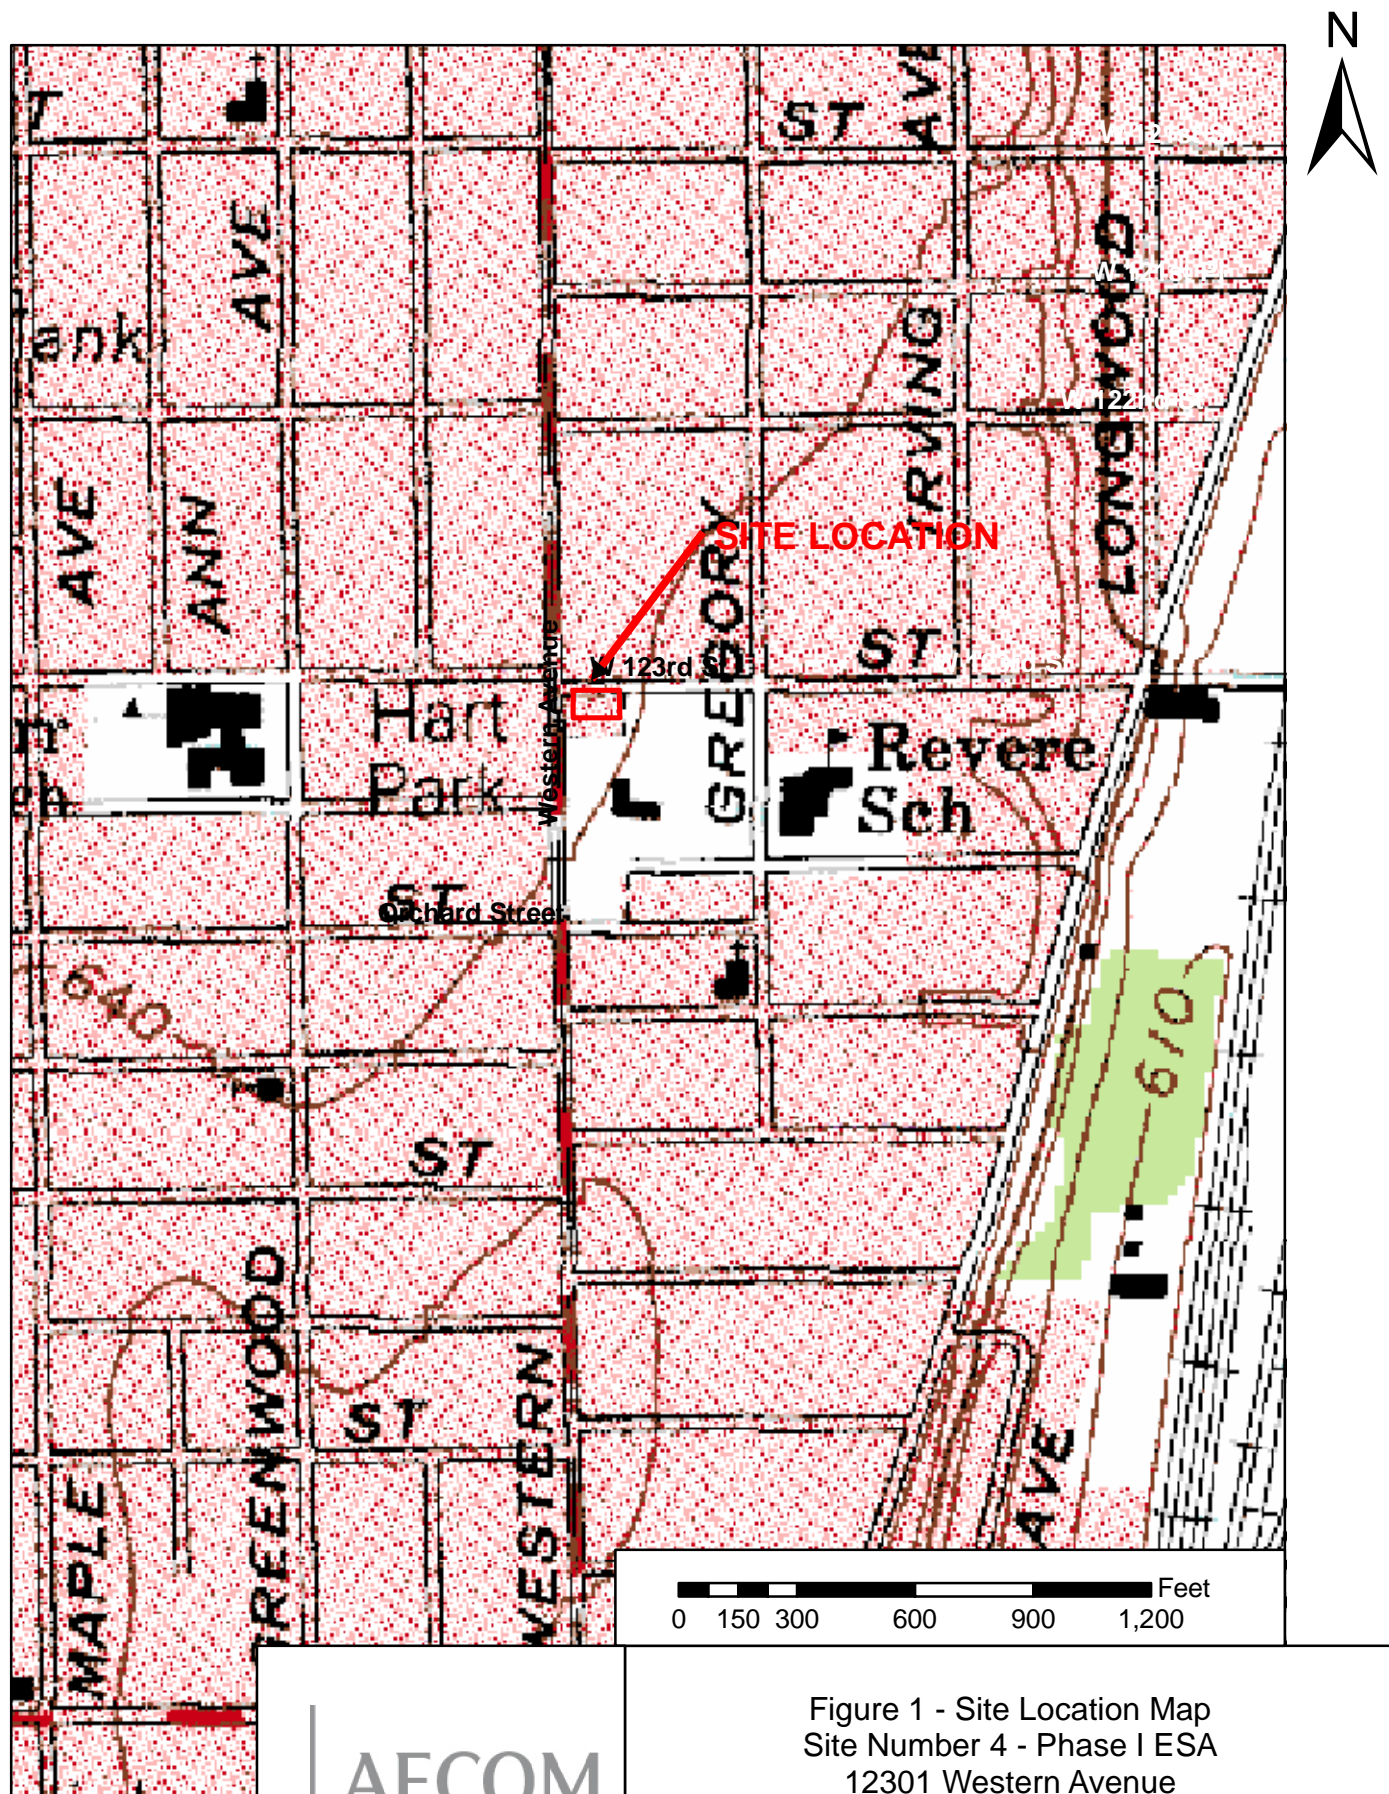

A compilation of recorded land title records (e.g., a Chain of Title report) covering a period back to the earlier of 1940 or the first known developed use (including agriculture) of the Property.

Per 40 CFR 312.26, the results of a search for any Activity and Use Limitation (AUL), such as an engineering control, land use restriction or institutional control that is in place at the Property and/or has been filed or recorded in a registry under federal, tribal, state or local law.

The complete identification of any party other than the User who expects to rely on the ESA report.

Notice of Disclaimer

Due to the limitations, constraints, inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental FirstSearch Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money.

A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

FINAL - Currently on the Final NPL

PROPOSED - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

DELISTED - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

PART OF NPL- Site is part of NPL site

DELETED - Deleted from the Final NPL

FINAL - Currently on the Final NPL

NOT PROPOSED - Not on the NPL

NOT VALID - Not Valid Site or Incident

PROPOSED - Proposed for NPL

REMOVED - Removed from Proposed NPL

SCAN PLAN - Pre-proposal Site

WITHDRAWN - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

NFRAP – No Further Remedial Action Plan

P - Site is part of NPL site

D - Deleted from the Final NPL

F - Currently on the Final NPL

N - Not on the NPL

O - Not Valid Site or Incident

P - Proposed for NPL

R - Removed from Proposed NPL

S - Pre-proposal Site

W – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

RCRAInfo facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM

TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.

Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that generate or transport hazardous waste or meet other RCRA requirements.

LGN - Large Quantity Generators

SGN - Small Quantity Generators

VGN – Conditionally Exempt Generator.

Included are RAATS (RCRA Administrative Action Tracking System) and CMEL (Compliance Monitoring & Enforcement List) facilities.

Federal IC / EC: EPA BROWNFIELD MANAGEMENT SYSTEM (BMS) - database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs.

FEDERAL ENGINEERING AND INSTITUTIONAL CONTROLS- Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation.

State/Tribal SWL: IL EPA ANNUAL LANDFILL CAPACITY REPORT - database of sanitary landfills available disposal capacity.

State/Tribal LUST: IL EPA LEAKING UNDERGROUND STORAGE TANK INCIDENT TRACKING DATABASE - database of incidents reported to the Illinois Emergency Management Agency and the Illinois Environmental Protection Agency.

State/Tribal UST/AST: IL FMO STATEWIDE UNDERGROUND STORAGE TANK LISTING - database of underground storage tanks. The data includes tank, contact and enforcement information.

State/Tribal EC: IL EPA SITE REMEDIATION PROGRAM DATABASE SUBSET- database of all voluntary remediation projects administered through the Pre-Notice Site Cleanup Program (1989 to 1995) and the Site Remediation Program (1996 to the present). These sites are included in this database only if they have an engineering control placed upon them.

State/Tribal IC: IL EPA SITE REMEDIATION PROGRAM DATABASE SUBSET- database of all voluntary remediation projects administered through the Pre-Notice Site Cleanup Program (1989 to 1995) and the Site Remediation Program (1996 to the present). These sites are included in this database only if they have an institutional control placed upon them.

State/Tribal VCP: *IL EPA* SITE REMEDIATION PROGRAM DATABASE - database of all voluntary remediation projects administered through the Pre-Notice Site Cleanup Program (1989 to 1995) and the Site Remediation Program (1996 to the present).

RADON: *NTIS* NATIONAL RADON DATABASE - EPA radon data from 1990-1991 national radon project collected for a variety of zip codes across the United States.

State Other: *US DOJ* NATIONAL CLANDESTINE LABORATORY REGISTER - Database of addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the U.S. Department of Justice ("the Department"), and the Department has not verified the entry and does not guarantee its accuracy. All sites that are included in this data set will have an id that starts with NCLR.

State Other: *IL DPH* METHAMPHETAMINE LABORATORY – Database of illegal drug laboratories.

WATER FACILITIES

WATER FACILITIES
 Municipal sewerage. Source, 8" main, on Chicago system.
 1 force main, capacity 250,000 gallons, cast-iron. 1 slow-gravity tank, 75,000 gal., base elevated 105' on steel frame. 2 Yucatan-cleaver pumps, rated 250 and 750 G.P.M.
 4 miles of water main 12" to 8" diameter, 178 double and triple hydrants, 640 lbs. Average daily consumption—75,000 gallons.

FIRE DEPARTMENT

FIRE DEPARTMENT
1 chief, 1 assistant chief and 24 men partly paid. 1 station.
1 Prospect truck carrying pump, capacity 300 G.P.M., 140 gallon hose
and 150' 1 1/2" hose. 1 Prospect truck carrying pump, capacity 250 G.P.M.,
ladder jack and 500' 2" hose. 1 Chevrolet rescue truck. Total of 3200' 2 1/2"
1 1/2" hose.

FIRE-RAINY
edified Man

FILE-SENSITIVE ROOFING ORDINANCE prohibiting construction of wood roofs, adopted May 3, 1960.

CALONITT PARK VILLAGE

POPULATION: 2,493.
PREVAILING WINDS: Southwest.
PAYING: Africa mostly paved.

WATER FACILITIES

WATER FACILITIES
Municipal waterworks. Source, 12" conn. to Chicago system.
14½ miles of water main 6" to 8" diameter, 153 double and triple h.
Pressure 40 lbs. Average daily consumption 225,000 gallons.

1. FIRE DEPARTMENT

FIRE DEPARTMENT
1 chief, 1 assistant chief and 25 men partly paid. 1 station.
1 Chamber-Turner fire engine pump, capacity 600 gal., 1 M. M., 230 gallon bucket truck
1450' 1 1/2" hose and 200' 1 1/2" hose. 1 Packard car or truck.
Fire alarm by horn and telephone.
FIRE-RESISTIVE ROOFING ORDINANCE prohibiting the construction of non-
combustible roofs.

• **1997** – **1998** – **1999** – **2000** – **2001** – **2002** – **2003** – **2004** – **2005** – **2006** – **2007** – **2008** – **2009** – **2010** – **2011** – **2012** – **2013** – **2014** – **2015** – **2016** – **2017** – **2018** – **2019** – **2020** – **2021** – **2022** – **2023** – **2024** – **2025** – **2026** – **2027** – **2028** – **2029** – **2030** – **2031** – **2032** – **2033** – **2034** – **2035** – **2036** – **2037** – **2038** – **2039** – **2040** – **2041** – **2042** – **2043** – **2044** – **2045** – **2046** – **2047** – **2048** – **2049** – **2050** – **2051** – **2052** – **2053** – **2054** – **2055** – **2056** – **2057** – **2058** – **2059** – **2060** – **2061** – **2062** – **2063** – **2064** – **2065** – **2066** – **2067** – **2068** – **2069** – **2070** – **2071** – **2072** – **2073** – **2074** – **2075** – **2076** – **2077** – **2078** – **2079** – **2080** – **2081** – **2082** – **2083** – **2084** – **2085** – **2086** – **2087** – **2088** – **2089** – **2090** – **2091** – **2092** – **2093** – **2094** – **2095** – **2096** – **2097** – **2098** – **2099** – **2100** – **2101** – **2102** – **2103** – **2104** – **2105** – **2106** – **2107** – **2108** – **2109** – **2110** – **2111** – **2112** – **2113** – **2114** – **2115** – **2116** – **2117** – **2118** – **2119** – **2120** – **2121** – **2122** – **2123** – **2124** – **2125** – **2126** – **2127** – **2128** – **2129** – **2130** – **2131** – **2132** – **2133** – **2134** – **2135** – **2136** – **2137** – **2138** – **2139** – **2140** – **2141** – **2142** – **2143** – **2144** – **2145** – **2146** – **2147** – **2148** – **2149** – **2150** – **2151** – **2152** – **2153** – **2154** – **2155** – **2156** – **2157** – **2158** – **2159** – **2160** – **2161** – **2162** – **2163** – **2164** – **2165** – **2166** – **2167** – **2168** – **2169** – **2170** – **2171** – **2172** – **2173** – **2174** – **2175** – **2176** – **2177** – **2178** – **2179** – **2180** – **2181** – **2182** – **2183** – **2184** – **2185** – **2186** – **2187** – **2188** – **2189** – **2190** – **2191** – **2192** – **2193** – **2194** – **2195** – **2196** – **2197** – **2198** – **2199** – **2200** – **2201** – **2202** – **2203** – **2204** – **2205** – **2206** – **2207** – **2208** – **2209** – **2210** – **2211** – **2212** – **2213** – **2214** – **2215** – **2216** – **2217** – **2218** – **2219** – **2220** – **2221** – **2222** – **2223** – **2224** – **2225** – **2226** – **2227** – **2228** – **2229** – **2230** – **2231** – **2232** – **2233** – **2234** – **2235** – **2236** – **2237** – **2238** – **2239** – **2240** – **2241** – **2242** – **2243** – **2244** – **2245** – **2246** – **2247** – **2248** – **2249** – **2250** – **2251** – **2252** – **2253** – **2254** – **2255** – **2256** – **2257** – **2258** – **2259** – **2260** – **2261** – **2262** – **2263** – **2264** – **2265** – **2266** – **2267** – **2268** – **2269** – **2270** – **2271** – **2272** – **2273** – **2274** – **2275** – **2276** – **2277** – **2278** – **2279** – **2280** – **2281** – **2282** – **2283** – **2284** – **2285** – **2286** – **2287** – **2288** – **2289** – **2290** – **2291** – **2292** – **2293** – **2294** – **2295** – **2296** – **2297** – **2298** – **2299** – **2300** – **2301** – **2302** – **2303** – **2304** – **2305** – **2306** – **2307** – **2308** – **2309** – **2310** – **2311** – **2312** – **2313** – **2314** – **2315** – **2316** – **2317** – **2318** – **2319** – **2320** – **2321** – **2322** – **2323** – **2324** – **2325** – **2326** – **2327** – **2328** – **2329** – **2330** – **2331** – **2332** – **2333** – **2334** – **2335** – **2336** – **2337** – **2338** – **2339** – **2340** – **2341** – **2342** – **2343** – **2344** – **2345** – **2346** – **2347** – **2348** – **2349** – **2350** – **2351** – **2352** – **2353** – **2354** – **2355** – **2356** – **2357** – **2358** – **2359** – **2360** – **2361** – **2362** – **2363** – **2364** – **2365** – **2366** – **2367** – **2368** – <

REPORT

EVERGREEN PARK

POPULATION: 13,000.
PREVAILING WINDS: N.E. & N.W.
PAVING: 50 miles concrete and macadam.

WATER FACILITIES

Municipally owned. Supply from Chicago through 8" connection at 87th St. and Kedzie Ave. and one 5" connection at 95th and Western Ave. Direct pressure system. 1 American Well Works pump capacity 300 G.P.M. and 1 American Well Works pump capacity 500 G.P.M. 6,000 gallon reservoir. 70 miles 6", 8" and 12" mains. 325 triple hydrants. Average daily consumption 1,000,000 gallons. Domestic and fire pressure at 95th St. and Kedzie Ave. is 24 lbs.

FIRE DEPARTMENT

Volunteer. 1 chief, 1 assistant chief and 30 men. Paid by call. 3 stations.

STATION NO. 1: 1 Ford truck with 750 G.P.M. Hale pump, 250 gallon booster tank, 700' 2 1/2" hose, 400' 1 1/2" hose and 250' 1" hose. 1 American-LaFrance truck with 500 G.P.M. pump, 500' 2 1/2" hose, 200' 1 1/2" hose.

STATION NO. 2: 1 Ford truck with 500 G.P.M. pump, 200 gallon booster tank, 500' 2 1/2" hose, 200' 1 1/2" hose and 200' 1" hose.

Alarm by siren and telephone.

FIRE-RESISTIVE ROOFING ORDINANCE adopted 1942.
prohibits construction or replacement of wood shingle roofs.
NO FIRE LIMITS.

MERRIONETTE PARK

POPULATION: 950.
PREVAILING WINDS: N.E. & N.W.
PAVING: 2 miles.

WATER FACILITIES

Water supply direct from Chicago. 4700' of 6" mains. 13 triple hydrants. Average daily consumption approximately 75,000 gallons. Pressure 37 lbs.

FIRE DEPARTMENT

Volunteer. 1 chief, 1 assistant chief, 25 men. Paid by call. 1 station. 1 Ahrens-Fox triple combination pumper capacity 750 G.P.M. 250' 2 1/2" hose, 150' 1 1/2" hose, 150' booster hose and one 75 gallon booster tank.

Fire alarm by telephone and siren.

FIRE-RESISTIVE ROOFING ORDINANCE adopted May 1, 1946.

GARDEN HOMES (sheets 74 & 75)

WORTH TWP.

POPULATION: 500.
PREVAILING WINDS: N.E. & N.W.
PAVING: 5 miles macadam.

WATER FACILITIES: None.

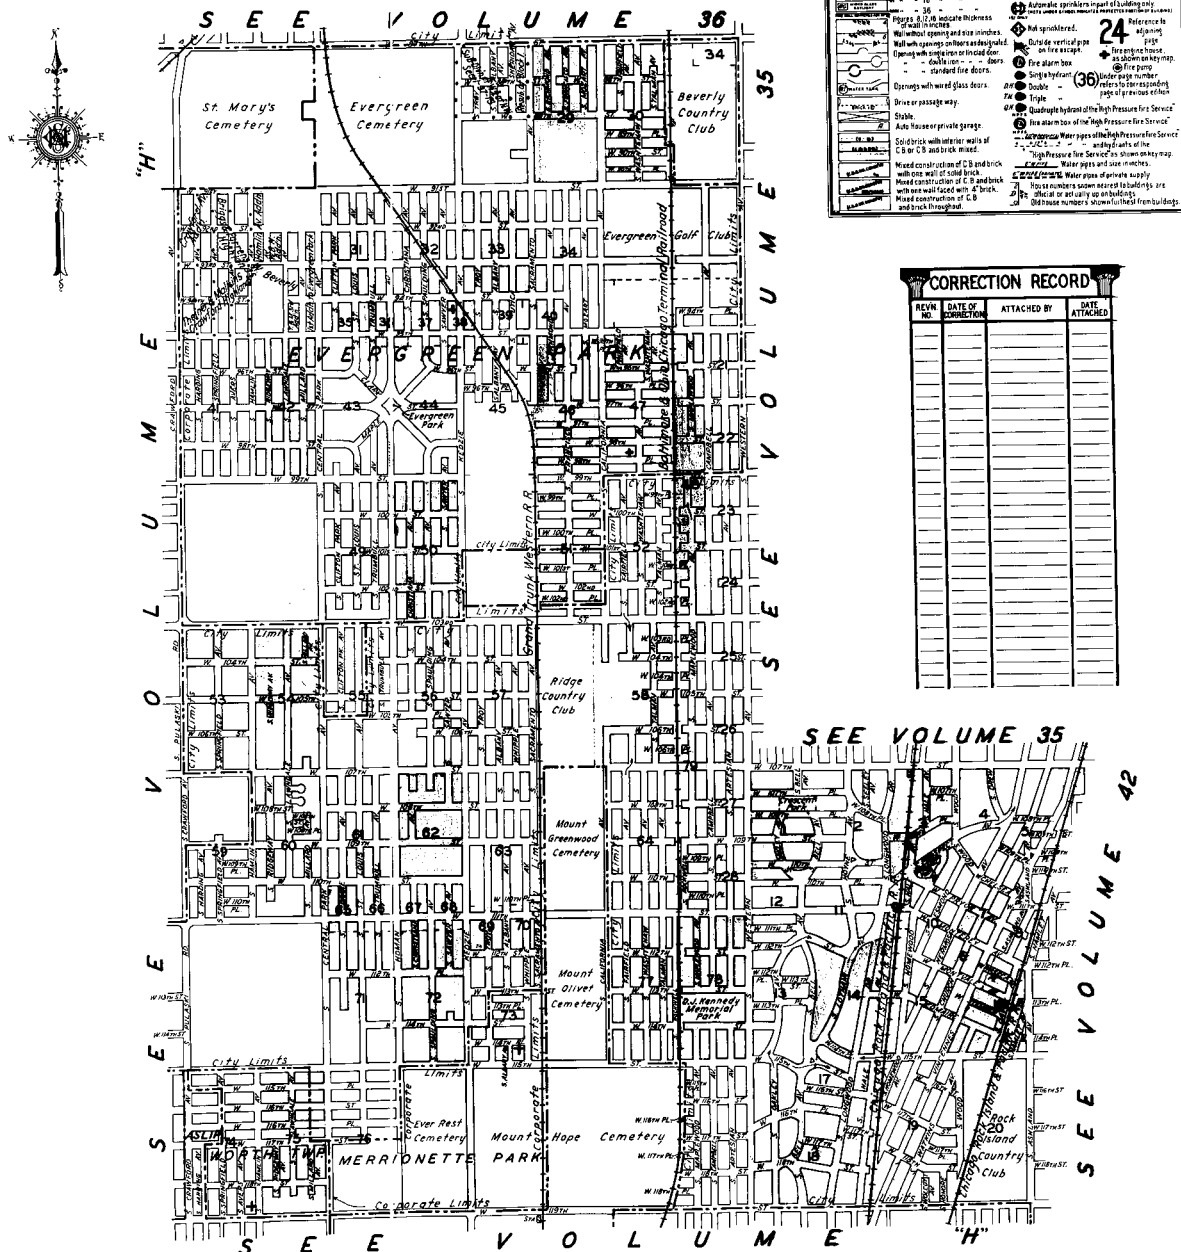

FIRE DEPARTMENT

Volunteer. 1 chief, 1 assistant chief, 28 men. 1 station. 1 American-LaFrance truck with 500 G.P.M. Hale pump, 500 gallon booster tank, 250' 1 1/2" hose, 150' 1" hose. 1 Ford truck with 200 G.P.M. American-LaFrance pump, 250 gallon booster tank, 200' 2 1/2" hose, 200' 1 1/2" hose. Four 125 lb. carbon dioxide cylinders tied in manifold, 400' 1" hose, 200' 1" hose, one 50 lb. foam generator unit.

Alarm by siren automatically controlled from Blue Island Telephone Exchange.

NO FIRE-RESISTIVE ROOFING ORDINANCE.

Sarah T. Monette
Environmental Engineer

Education

BS, Civil Engineering, University of Connecticut, 1992

Experience Summary

Ms. Monette is an environmental engineer with Earth Tech in Chicago. Her experience includes regulatory compliance audits, environmental site assessments, site investigations, spill prevention and control plans, pollution prevention plans, community right-to-know reporting, emissions permitting, waste management, human health risk assessments, and remedial action design and operation. She has conducted evaluations of steel mills, metal finishers, manufacturers (aerosol cans, steel pails, automatic doors, plastic models, hammers, aircraft controls, automotive parts), grain elevators, pharmaceutical laboratories, truck terminals, waste incinerators, hazardous/radioactive waste transportation, retail centers, hospitals, underground storage tank farms, wastewater treatment plants. She skills include physical field work (soil borings, monitoring wells, soil and water samples, land surveys), data evaluation and calculation, computer modeling and database maintenance, data presentation, report preparation, and public speaking. She has developed working relationship with regulatory agencies in Illinois, Wisconsin, Kansas, Louisiana, and Pennsylvania.

Bryant Williams
Environmental Scientist

Education

BA, Environmental Science and Biology, Olivet College, 2000

Experience Summary

Mr. Williams has eight years of experience in environmental consulting, including environmental property assessments, environmental compliance audits, subsurface soil investigation, groundwater monitoring, underground storage tank removal, indoor air quality studies, lead and asbestos surveys, project management, and asbestos operations and maintenance plan development. He has worked extensively with USEPA, IEPA, MDEQ, WDNR, IDEM, OEPA, OSHA, and IDPH regulations.

Project Experience

City of Blue Island, Environmental Assessment and Brownfield Investigation, Blue Island, Illinois. Project manager for environmental consulting related to a brownfield redevelopment, including assisting the city with selecting 25 sites to perform Phase I ESAs, completion of the 25 Phase I ESAs, completion of two Phase II subsurface investigations, and development of cost and closure strategies for the two Phase II sites. [05/2008 - 12/2008]

Allied Tube & Conduit, Phase I Environmental Site Assessments, South Holland and Monee, Illinois. Conducted Phase I ESAs at two properties that the client is considering for use as warehouse space. [05/2008 - 05/2009]

New Pisgah Baptist Church, Phase II Environmental Site Assessment, Chicago, Illinois. Conducted a Phase II ESA to address the RECs identified in the May 2007 Phase I ESA. Conducted a test pit investigation to determine whether USTs remain at the site, followed by soil and groundwater sampling to assess the subsurface at the site for contaminants. [12/2007 - 02/2008]

Environmental Investigation and Remediation Oversight at 135th Street and Calumet-Saginaw Road, Crestwood, Illinois. Project manager for an asbestos demolition investigation, Phase II subsurface investigation, underground storage tank removal, soil excavation and asbestos abatement of a 20-acre site consisting of 10 commercial, residential, and industrial facilities. The subsurface investigation included 65 soil borings throughout the site. [Carlson Environmental, 01/2004-01/2005]

Phase II Environmental Site Assessments, Multiple Locations. Performed 75 projects requiring the review of previous environmental assessments, advancement of soil borings, on-site field screening and collection of soil samples, magnetometer surveys, and technical report preparation to identify environmental concerns associated with the property and to make specific recommendations concerning the need for and extent of further investigations or remediation.

Chicago Department of Water Management, 2006 Water Main Contracts Environmental Screening and Subsurface Soil Investigation, Chicago, Illinois. Project manager for 150 environmental screening investigation perform and conducted soil boring investigations at 22 project sites that were slated for water main alignment upgrades in 2006 to gather enough data to determine whether the soils in the areas of proposed water main upgrades may require special handling and disposal during construction. The technical approach was developed using the Illinois Environmental Protection Agency (IEPA) Tiered Approach to Corrective Action (TACO) Tier 1 Soil Remediation Objectives (SROs) as provided in 35 IAC Part 742 for comparison of soil analytical results. [EDI, 10/2005-11/2005]

Chicago Department of Water Management, 2007 Water Main Contracts Environmental Screening and Subsurface Soil Investigations, Chicago, Illinois. Project manager for 150 environmental screening investigation perform and conducted soil boring investigations at 46 project sites that are slated for water main alignment upgrades in 2007 to gather enough data to determine whether the soils in the areas of proposed water main upgrades may require special handling and disposal during construction. The technical approach was developed using the Illinois Environmental Protection Agency (IEPA) Tiered Approach to Corrective Action (TACO) Tier 1 Soil Remediation Objectives (SROs) as provided in 35 IAC Part 742 for comparison of soil analytical results. [EDI, 09/2006-04/2007]

Various Clients, Phase I Environmental Site Assessments, Transaction Screens, and Environmental Compliance Audits, Multiple Locations. Performed more than 250 ESA and ECA projects at industrial, commercial, and residential properties in Alabama, California, Illinois, Indiana, Michigan, Minnesota, Missouri, North Carolina, Ohio, Pennsylvania, Tennessee, Wisconsin, and Wyoming. Each ESA included a detailed site inspection, historical document and environmental database review, appropriate interviews, a detailed on-site inspection of present property conditions and adjacent property influences, and technical report preparation to identify environmental concerns associated with the property and to make specific recommendations concerning the need for and extent of further investigations.

USEPA - Region V, Superfund Technical Assistance Team Contract, Chicago, Illinois. Health and safety officer for small-scale environmental sampling events at various sites. Assisted in the development of the generic quality assurance plan

and field-sampling plan. Assisted and/or reviewed site-specific field-sampling plans and health and safety plans related sampling of groundwater, surface water, residential wells, soil, sludge, sediment, and fish tissue. [EDI, 08/2005-09/2007]

Illinois Department of Transportation, Dan Ryan Expressway Reconstruction Environmental Monitoring, Chicago, Illinois. Conducted air monitoring and noise sampling. Collected air samples at identified sensitive receptor locations and submitting the samples for laboratory analysis of total nuisance dust, respirable silica, particulate matter, and asbestos, lead, and diesel components. Reviewed real-time particulate matter PM10 and PM 2.5 data for comparison to established voluntary action levels set below EPA National Ambient Air Quality Standards. Maintained a project log describing the air sampling, noise, and vibration monitoring locations, construction areas, and construction activities. [EDI, 2004-2007]

Rockwell Gardens, Environmental Oversight, Chicago, Illinois. Project manager performing environmental oversight during the remediation of lead and PNA-contaminated soil. Tracked soil waste manifests and green space soil location removal, and performed air monitoring to ensure the dust levels generated during the on-site excavation of soils did not exceed the permissible exposure limit. [EDI, 02/2006-09/2007]

Multiple Clients, Asbestos Operations and Management Plan Coordination, Illinois, Indiana, and Wisconsin. Developed and implemented asbestos operations and maintenance plans for more than 120 commercial and industrial facilities in accordance with state and federal regulations. [Carlson Environmental, 12/2002-02/2005]

Sears and Roebuck, Asbestos Inspections and Abatement, Illinois, Indiana, and Texas. Conducted asbestos inspections and performed project management (including asbestos air monitoring) of approximately 35 department stores. [GLE Associates, 12/2001-12/2002]

Lead-Based Paint Risk Assessments, Ingham County, Michigan. Conducted LBP risk assessments and developed remediation plans for more than 30 residential properties. [PSI, 12/2000-08/2001]

Ferris State University Construction Management Organization, Lectures on Mold Growth: Causes and Prevention, Big Rapids, Michigan. Presented a lecture on causes of indoor mold growth, prevention of indoor mold growth, risk management and insurance related issues caused by indoor mold growth. [GaiaTech, 04/2005]

Chicago Department of Environment, Critical Facility Assessments, Chicago, Illinois. Conducted assessments at several facilities that contained extremely hazardous substances as defined by EPCRA, which were funded by the Department of Homeland Security. Conducted site visits to identify chemicals stored on site and the amounts and nature of storage, on-site emergency and spill response equipment, emergency shutdown procedures, and potential reactions or affects from emergency shutdown or loss of power. After the site investigations were completed, the data were evaluated to identify worst-case and two alternative release scenarios using the USEPA Computer-Aided Management of Emergency Operations (CAMEO) model. GIS was used to map plume transport distances for the worst case scenario for each site. At the completion of the work, electronic versions of emergency response guide for each facility were prepared. The reports included information gathered at the site, site maps showing pertinent information such as chemical storage locations, emergency and spill response equipment, and a map with plume transport distances for the worst case scenario. These reports will be used by the Chicago Fire Department and the DOE to provide emergency response to future chemical releases. [EDI, 11/2006-01/2007, subcontractor to CDM]

Earth Tech Health & Safety Training

01 - Safety Orientation 01/15/2008
03 - Defensive Driving Awareness Training 01/16/2008
30 - Respiratory Protection Training 02/27/2008
34 - General Excavation Safety Training 02/27/2008
Asbestos Worker Medical Exam 02/14/2008
Canadian National Railroad On-Track 02/08/2008
Employee Substance Abuse Training 05/19/2008
Project Management Training - Basic 07/23/2008
Respirator Fit Test 02/27/2008

Employment History

10/2007 - present, Earth Tech, Environmental Scientist
2005 - 09/2007, EDI, Inc., Environmental Scientist
04/2005, GaiaTech, Environmental Scientist
12/2002 - 02/2005, Carlson Environmental, Environmental Scientist
12/2001 - 12/2002, GLE Associates, Environmental Scientist
12/2000 - 08/2001, PSI Inc., Environmental Scientist
